- Up to 4K 4:4:4 12-bit HDR
- Auto detect color profile
- AES encrypted streams up to 256-bit
- Join unicast or multicast sessions
- Save & apply session profiles
- Supports 3D LUTs
- Up to 16-Ch audio
- Very Low Latency ACT-L3/5 Codec
- Supports watermarking
- Compatible with all Streambox encoders

SUPER EASY REMOTE WORKFLOWS

Setting up a remote session can be a hassle when your remote clients are literally working from home or an office without access to pro-level infrastructure devices like dedicated streaming decoders. Streambox Media Player for macOS provides an ideal solution!

Simply have your client download the *free* Streambox Media Player directly to their macOS device - including those with Apple silicon - and make a few simple configuration settings. When you are ready to start the session, simply email a point-to-point or multi-point connection code.

Compatible with the full range of Streambox Encoders!

Choose from amongst the industry's most extensive range of affordable hardware and software encoders, supporting every format from HD to 4K HDR.
